Making Standards and Technology Work

Justin Smith DVM
Kansas Animal Health Commissioner
September 26, 2017
Electronic Data Utilization

- Leverage in-house data software
- Development of “States” eCVI
  - Rollout to practicing veterinarians
- Willing to accept electronic data
  - Additional electronic CVI forms
  - Livestock Market data charts
  - OCV and testing charts/spreadsheets
eCVI Data Standards

• Version 1 - XML data exchange standards

• Version 2 - enhancing Version 1 to fix issues

• Need adoption of data standards for additional documentation types
  • Animal sightings
  • Official testing charts
  • Herd Health Plan movements
Challenges

• Continuing adoption of technology and data sharing

• Methodology to exchange data between states, both import and export

• Lack of interoperability between various databases limiting data exchange

• State’s laws and rules restricting data exchange
We’ve come a long way, but we still have a ways to go.
